Metal Barrel Mockup

8 Views

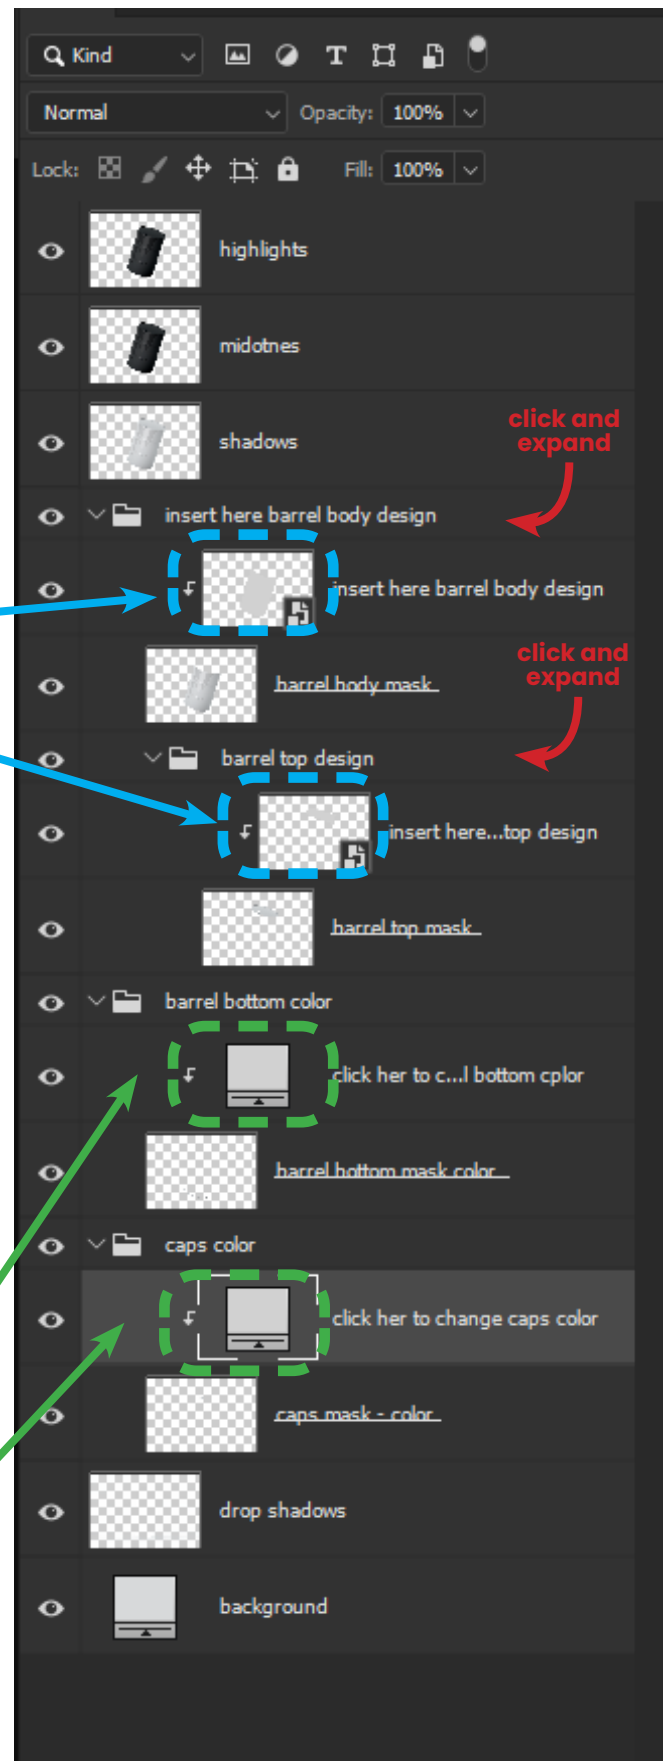

Using the files is very simple.

Every part of the scenes has been properly named... To insert your design, just locate and expand **the groups named “insert here barrel body design” or “barrel top design”**. Inside you will find a smart object: double click on it, insert your design, save close.

smart object for
to insert your
design

To change barrel parts color (top, bottom and caps), expand the relative group and locate the colored icon. Click on it, pick your color, save, close.

HIGHLIGHTS MIDTONES AND SHADOWS

You have full control over the highlights, midtones and shadows. To do that, locate the 3 layers named "highlight", "midtones" and "shadows" inside each layer group. Changing the fill and opacity value, You can calibrate the impact of highlight and shadow.

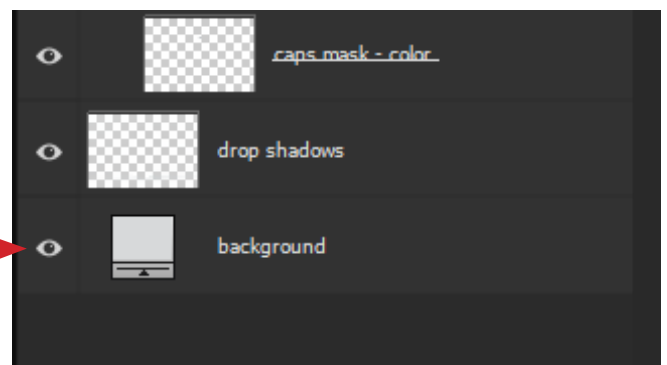

GROUND DROPSHADOW

You can hide/show the ground drop shadow. To do that, locate the layer named "drop shadow" and click on the "eye" icon near the the right layer name to set it ON / OFF.

BACKGROUND

You can use any background / color. To change color background, locate the layer named "background", click on it, pick your color, close, save.
